How to: Connect or disconnect from VPN on your iPhone or iPad

Solution

Open **Settings** and slide the switch next to **VPN** to the right to connect, or left to disconnect.

Details

💡 **NOTE:** The VPN service will need to be enabled on your account for GlobalProtect to connect. You may request access or verify that VPN is enabled for your account by contacting IT Help Central.

1) If you have not already done so, set up the TTUnet VPN connection.

2) Open the **Settings** app.

2) Slide the switch next to **VPN** to the right to connect, or left to disconnect. When connected, it will turn green.
OUTCOME

You will be able to connect or disconnect from TTUnet VPN. When connected, you will see a status indicator in the status bar along the top of your screen.
