How to: Use Remote Desktop Connection in Windows to access a remote Windows computer

Details

NOTE: Before attempting to connect to the remote computer, please ensure that you configure the remote computer to accept incoming connections.

1) In the search bar in the bottom-left corner, type Remote Desktop Connection and click on it in the search results.

   NOTE: For Windows 8/8.1 users, access the Charms Bar to search.

2) In the "Computer" field, type the host name or IP address of the computer to which you wish to connect. Then, click the Show Options button.
3) From the **Advanced** tab, click **Settings**.
