How to: Remove saved passwords from Firefox on macOS

Solution Title

How to: Remove saved passwords from Firefox on macOS

Solution

Click the menu bar > Options > Security > Saved Logins. Select your TTU login, and click Remove.

Details

1) Click the menu bar in the top right-hand corner. Click Options on Windows, or Preferences on Mac.

*NOTE:* If you do not see the menu bar, you may need to press the Alt key on your keyboard to unhide it.

2) Click the Security tab, then click Saved Logins.
3) Find the entry you wish to remove. For example, it may have the name of a TTU-related resource somewhere in the "Site" field. Select the entry and click **Remove**.

*NOTE:* It is possible that there could be more than one item you wish to remove. Be sure and confirm that you have found them all for each resource in question.
OUTCOME

Your previous password has now been removed from the browser.
