How to: Connect to Windows using Microsoft Remote Desktop on your iPhone or iPad

Details

NOTE: Before you can connect to a remote computer, you must first set up a connection profile on your iOS device. You must also configure the remote Windows computer to accept incoming connections.

1) Open RD Client.

2) From the list of configured connections, tap the connection you wish to use.
OUTCOME

Your iPhone or iPad will attempt to connect to the remote computer. When the connection is successful, you will see the remote desktop.
