How to: Set up TechMail on Android 7.0 Nougat

Details

NOTE: Android is highly customizable and may look different depending on your manufacturer. The steps below may vary for different devices.

1) Set up a non-simple passcode or password and enable encryption. If you have already done this, proceed to the next step.

TIP: For most devices, setting a passcode or password enables encryption automatically. If you have a passcode or password on your device, encryption may already be enabled.

2) Open Settings.

3) Tap Accounts.
4) Tap **Add account**.

5) Tap **Exchange**.
6) Type your TechMail address. Then, tap NEXT.

7) Type your eRaider password. Then, tap NEXT.
8) Tap OK on any prompts that you receive. For more information about these prompts, please see remote security administration.

NOTE: Depending on your device, you may or may not see the prompts.

9) Configure the following information. Then, tap NEXT.

- **DomainUsername**: your TechMail address (e.g. jane.doe@ttu.edu)
- **Password**: your eRaider password
10) Tap **OK** on any prompts that you receive. For more information about these prompts, please see remote security administration.

**NOTE:** Depending on your device, may not see the prompts.
11) Choose the items that you wish to sync with the TechMail servers. Then, tap NEXT.
12) Tap **Activate this device administrator**.

13) Type a descriptive name for your account, such as *TechMail*. Then, tap **NEXT**.

**OUTCOME**

You will be able to access and use TechMail on your Android device.
