

About Windows 10 availability to the TTU community

Details

University-owned computers

Texas Tech University has a licensing agreement with Microsoft which makes Windows operating systems available to TTUS and TTU faculty and staff for installation on university-owned computers.

 **NOTE:** Installing this software on a system located off campus or on a personally-owned system violates the terms of the Microsoft Campus Agreement. The resulting failed activation attempts will cause the system to display a message that the software is not legitimate and shut down the computer each time the message is displayed.

Departments at TTU may complete the form at <https://www.depts.ttu.edu/itts/software/forms/dept.php> to request the software.

Personally-owned computers

Students can obtain a one-time free download and install of Windows 10 through Texas Tech's partnership with [Microsoft Azure Dev Tools for Teaching and OnTheHub](#). You can search for Windows 10, along with other general consumer software through the [OnTheHub store front](#).

Faculty and staff can obtain Windows 10 at a discounted price through the same store front.
