How to: Reset your keychain on your Mac

Solution

Open the Keychain Access window. From the Keychain Access menu, click Preferences. Click the Reset My Default Keychain button. Type your password and click OK twice.

Details

1) In Spotlight, type in "Keychain Access" to open the application.

2) In the upper left corner, click Keychain Access menu. Then click Preferences.
3) Click **Reset My Default Keychains**.

4) Type your password and click **OK**.

5) Click **OK**.
Created a new empty “login” keychain with no password. Please change password using Edit > Change Password for Keychain.

Your old login keychain was renamed and can be found in your Keychains folder.

Show Keychains  OK

OUTCOME

Your keychain has been reset.
