How to: Use Remote Desktop Connection in Windows 8.1 or 8 to access a remote Windows computer

Details

NOTE: Before attempting to connect to the remote computer, please ensure that you configure the remote computer to accept incoming connections.

1) Access the Charms Bar, and click Search.

2) Type in "remote desktop connection", and click on Remote Desktop Connection.

2) In the "Computer" field, type the host name or IP address of the computer to which you wish to connect. Then, click the Show Options button.
3) Under the **Advanced** tab, click the **Settings** button.

4) Choose "Use these RD Gateway server settings". Then, configure the settings as follows and click **OK**.

- **Server name**: rdp.ttu.edu
- **Logon method**: Allow me to select later
5) Click **Connect**.
6) Type your username in the format `ttu\your_eRaider_username`. Use your eRaider password as the password. Then, click **OK**.

---

**OUTCOME**

You will be connected to the remote computer.
