Basic overview of the MyWeb service

Details

Introduction

The MyWeb service provides a location for current TTUS and TTU faculty, staff, and students to store their personal website and share it with the world at [https://www.myweb.ttu.edu/your_eRaider_username](https://www.myweb.ttu.edu/your_eRaider_username).

MyWeb is storage location for hosting your website. It does not provide the tools with which to develop your website. You can use your preferred development tools, and once the site is done you can upload it to the MyWeb service for hosting.

Storage space

The allocated quota for each MyWeb website is 2 GB.

Activation

Before you can use MyWeb, you must [activate your MyWeb service](https://www.myweb.ttu.edu/your_eRaider_username). After you activate the service, see [getting started with MyWeb](https://www.myweb.ttu.edu/your_eRaider_username) for more information.

Renewal

Beginning in the autumn of 2018, notifications are sent annually to current MyWeb users requiring them to renew the service if they would like to continue using it. This allows MyWeb administrators to optimize storage space, freeing up space which is not being used.

Additional Information about the renewal notifications:

- The emails will come from Renewals <renewals@ttu.edu> with a subject of "Renewal Notification for MyWeb Site".
- The first renewals email were sent around mid-October to early November of 2018.
- You will be asked to renew your MyWeb account every 12 months.
- After you receive a renewal email, you will have two weeks to renew before your site is automatically deleted.

Connect to MyWeb

- [File Explorer in Windows](https://www.myweb.ttu.edu/your_eRaider_username)
- [Finder in macOS](https://www.myweb.ttu.edu/your_eRaider_username)
- [Adobe Dreamweaver in macOS](https://www.myweb.ttu.edu/your_eRaider_username)
- [Adobe Dreamweaver in Windows](https://www.myweb.ttu.edu/your_eRaider_username)
