How to: Connect to TTUnet wireless in Chrome OS on a Chromebook

Details

1) From the desktop, click on the Status Area in the bottom right-hand corner.

2) When the dialog window opens, click the Wi-Fi status option as indicated below.
3) If your Wi-Fi radio is turned on and you are in range of a TTUnet wireless access point, click TTUnet.

If the Wi-Fi radio is turned off, click Turn Wi-Fi on to turn on the Wi-Fi radio.
4) Complete the following information. Then, click **Connect**.

- **EAP method**: PEAP
- **Phase 2 authentication**: MSCHAPv2
- **Identity**: your eRaider username
- **Password**: your eRaider password
OUTCOME

Your Chromebook with Chrome OS is now configured to connect to the TTUnet wireless network. Once you have successfully connected to TTUnet wireless, the Wi-Fi icon and Wi-Fi status information in the status area should indicate Connected to TTUnet.
