How to: Enable Remote Desktop connection on a host computer in Windows 10

Solution

One click activation: Click the button below and click open link. Ensure Remote Desktop is set to on.

Enable Remote Desktop

Details

1) In the search bar in the Start menu, type System. Then, press Enter.

2) In the upper-left side of the window, click Remote settings.
3) Choose **Allow remote connections to this computer**, and then check the box next to "Allow connections only from computers running Remote Desktop with Network Level Authentication (recommended)." Then, click **OK**.

*NOTE:* If the Remote Desktop software on your local device is not from Microsoft, Network Level Authentication may not be supported. Check with the manufacturer to be certain. If it is not supported, choose "Allow connections from computers running any version of Remote Desktop (less secure)."

**OUTCOME**

Your computer is now configured to allow remote connections to it.
