How to: Set up TechMail on Android 6.0 Marshmallow

Details

**NOTE:** Android is highly customizable and may look different depending on your manufacturer. The steps below may vary for different devices.

1) Set up a non-simple passcode or password and enable encryption. If you have already done this, proceed to the next step.

**TIP:** For most devices, setting a passcode or password enables encryption automatically. If you have a passcode or password on your device, encryption may already be enabled.

2) Tap **Settings**.

3) Under the **PERSONAL** tab, tap **Accounts**.
4) Tap **Add account**.

5) Tap **Exchange**.
6) Type your TechMail address. Then, tap **NEXT**.
7) Type your eRaider password. Then, tap NEXT.

8) Tap OK on any prompts that you receive. For more information about these prompts, please see remote security administration.

NOTE: Depending on your device, you may or may not see the prompts.
9) Configure the following information. Then, tap **NEXT**:

- **Domain/Username**: your TechMail address (e.g. john.doe@ttu.edu)
- **Password**: your eRaider password
- **Server**: outlook.office365.com
10) Tap **OK** on any prompts that you receive. For more information about these prompts, please see remote security administration.

**NOTE:** Depending on your device, you may or may not see the prompts.
11) Choose the items you wish to sync with the TechMail servers. Then, tap NEXT.
12) Tap **ACTIVATE**.

13) Type a descriptive name for your account, such as *TechMail*. Then, tap **NEXT**.
OUTCOME

You will be able to access and use TechMail on your Android device.
