How to: Set up TechMail on Android 7.0 Nougat

Details

**NOTE:** Android is highly customized and may look different depending on your manufacturer. You may see differences when following these steps.

1) Set up a non-simple passcode or password and enable encryption. If you have already done this, skip to Step 2.

**TIP:** For most devices, setting a passcode or password enables encryption automatically. If you have a passcode or password on your device, encryption may already be enabled.

2) Tap **Settings**.

3) Scroll to find and tap **Accounts**.
4) Tap **Add account**.

5) Tap **Exchange**.
6) Type your TechMail address in the field, then tap Next.

7) Type your eRaider password in the field, then tap Next.
8) Tap **OK** on any prompts you see to continue. For more information about this prompt, please see remote security administration.

*NOTE:* Depending on your device, you may or may not see the prompts.

9) Configure the following information, then tap **Next**.

- **DomainUsername**: your TechMail address (e.g. red.raider@ttu.edu)
- **Password**: your eRaider password
10) Tap **OK** on any prompts you see to continue. For more information about this prompt, please see [remote security administration](#).

**NOTE**: Depending on your device, may not see the prompts.
11) Choose the preferences you wish to sync with the TechMail servers. Then, tap Next.
12) Tap **Activate this device administrator**.

13) Type a descriptive name for your account, such as *TechMail*. Then, tap **Next**.

**OUTCOME**

You will be able to access and use TechMail on your Android device.
