

How to: Connect to your MyWeb website using Finder on your Mac

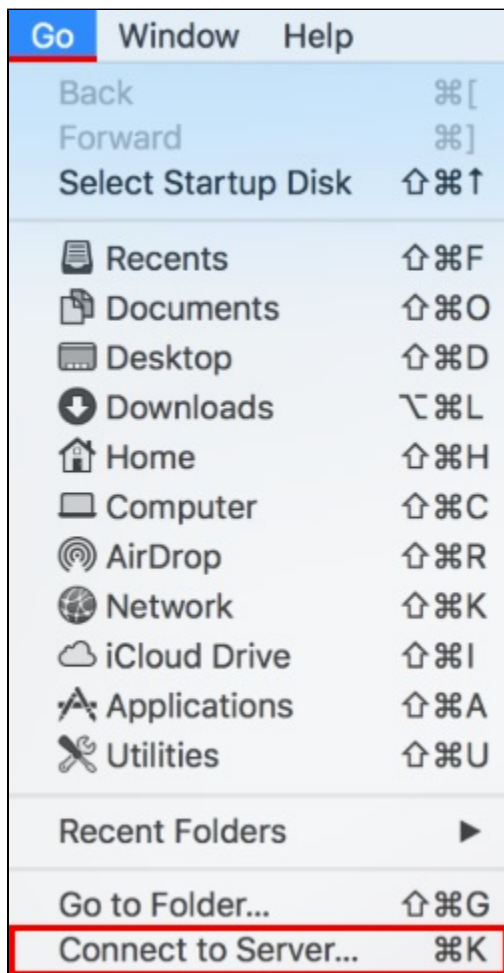

Solution

Click on **Finder**. From the menu bar, click **Go** and then **Connect to Server**. Type in the path for your RaiderDrive and click **Connect**.

Details

 **NOTE:** If you are off the TTU campus or in the TTU residence halls, you will need to establish a [TTUnet VPN connection](#).

- 1) Click on the **Finder** icon in the Dock.
- 2) From the menu bar, click **Go** and then **Connect to Server**.

- 3) If you are on macOS 10.12 or newer, type `smb://myweb.ttu.edu/users/your_eRaider_username` and click **Connect**.

 **TIP:** Click the plus (+) button to add the path to your Favorite Servers so you will not have to type the address in the future.

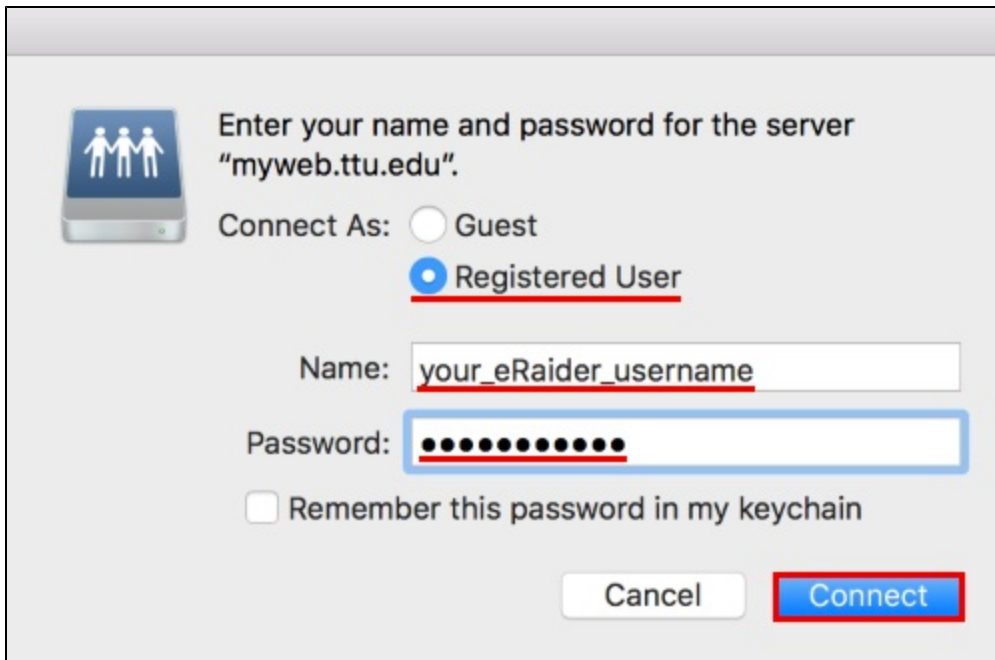

If you are on macOS 10.11 or older, type `cifs://myweb.ttu.edu/users/your_eRaider_username` and click **Connect**.

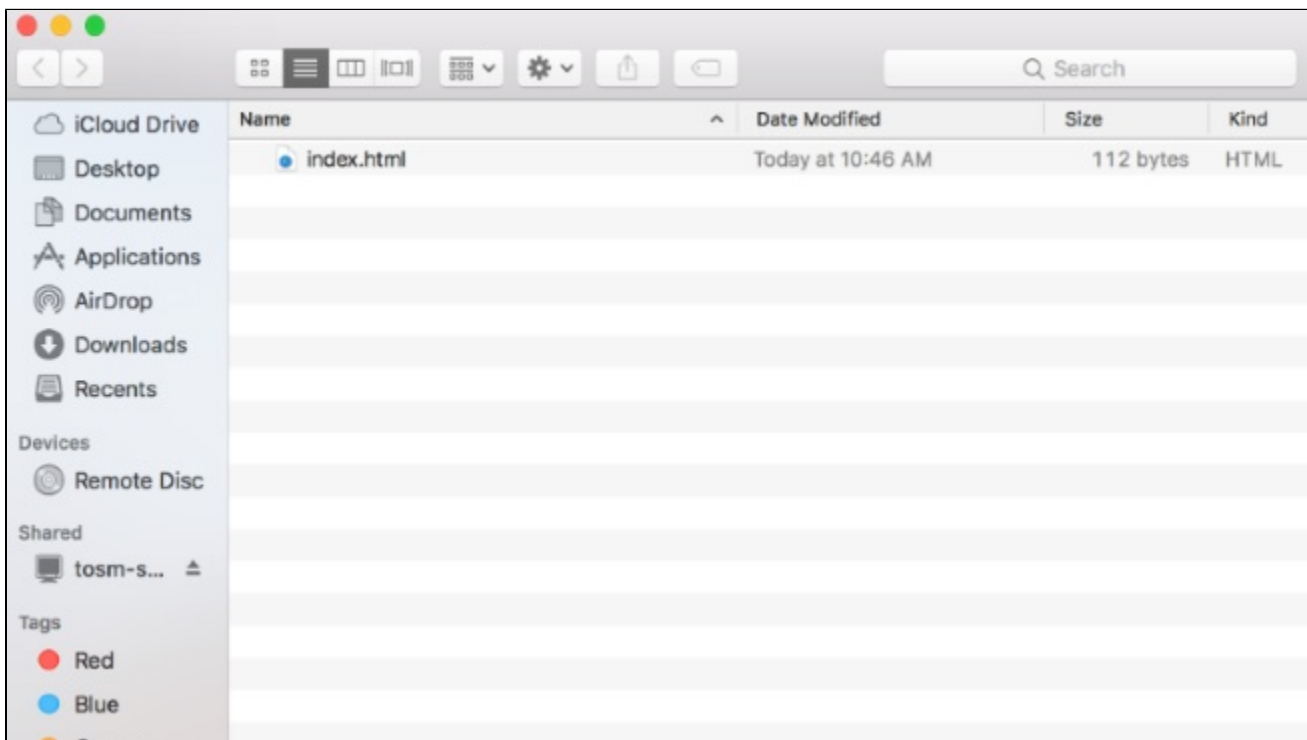

4) If you are prompted for credentials, select **Registered User** and type your eRaider username and password. Then, click **Connect**.

- **Name:** `your_eRaider_username`
- **Password:** your eRaider password

5) Finder will open a window to your MyWeb files.

OUTCOME

You can publish your website by dropping your files into this folder. Any files or folders moved or copied to the "myweb" folder will be readable by the public over the Web. You can create/edit files here to modify your website. Any files you delete from here will be *unrecoverable*.

The name of the home page required is one of the following:

- index.php
- index.asp
- index.aspx

- index.htm
- index.html
- default.php
- default.asp
- default.aspx
- default.htm
- default.html
- home.php
- home.asp
- home.aspx
- home.htm
- home.html

The Web server will look for the file names in the order listed above. The file name is *case sensitive*. If you rename your home page file to one of these file names, then the page should show up when you go to your website's URL. Be sure you have your home page in the root directory of your account.
